LATEX·ITE®
RETRACK 200

**LATEX RESPRAY FOR
EITHER EXISTING
LATEX OR URETHANE
TRACK**

"We wanted to maintain the high performance level of our existing surface while providing a new surface that was better for the environment. When you informed us about Dalton's new Latex Re-Track system and ensuring a permanent bond between our existing urethane track we were sold! The track looks great and is performing at a high level, while earning positive reviews.

We are very happy with our new track surface and I'd be happy to recommend you, your company and "Re-Track" product to anyone in the market!"

Edward Reilly Director of Athletics
Worcester Academy, Worcester. MA
